GARD County Activities – Romania

History: GARD program was initiated in Romania in 2008 by Dr. Florin Mihaltan. The Romanian Society of Pneumology (https://www.srp.ro) and the Romanian Society of Allergology are GARD members.

5-Year Action Plan:
- Increase the adherence to treatment of patients with CRDs
- Continue tobacco control activities with Ministry of Health and Chamber of Deputies
- Update the National guidelines for asthma and COPD
- Plan advocacy activities to increase contribution to Universal Health Coverage
- Conduct research activities in regards to national prevalence of CRDs
- Increase the diagnosis and monitoring of CRDs comorbidities

Outreach Activities Involving Patients, Families and Health Care Professionals:

Advocacy – aim to increase contribution to health coverage

Research & Education - provide online easy-to-understand materials for patients & families

Workshops & Conferences – Experts to combat air pollution

Programmes - Promote asthma management on World Asthma Day

For more information on GARD Romania, contact GARD Romania National Coordinators: Dr. Florin Mihaltan (mihaltan@starnets.ro); Dr. Ruxandra Ulmeanu (r_ulmeanu@yahoo.com) and Dr. Roxana Maria Nemes (roxa.nemes@gmail.com)
We Welcome to GARD - Breathing Games
(https://www.breathinggames.net/en)

Breathing Games

Like oxygen, play is all around us, yet gets mostly unnoticed until it is missing. S. Brown

Breathing Games encourages everyone to take care of respiratory health through play. We collectively create self-care games and sensors that can be reproduced and adapted by local communities. Games transform healthcare into fun and rewarding experiences while simultaneously tackling prevention and adherence. Open source sensors can ease the access to spirometry in low-resource areas, and the mapping of respiratory health around the globe.

Join our open science community, build on the work realized collectively in Canada, France, Switzerland!

Activities on World Lung Day

• On September 25, respiratory organizations from around the world celebrated World Lung Day (WLD). WLD provides an opportunity for us all to unite and advocate for better respiratory health and air quality globally.

WE SUPPORT World Lung Day
25 September

Reducing tobacco consumption.
Controlling unhealthy air.
Strengthening immunisation programmes.
Will save lives.

We believe that everyone has the right to breathe clean air and we ask lawmakers to enact and ensure clean air standards in all countries.

Pneumonia is the leading cause of death in the very young and very old.

4 million deaths annually.

Vaccinations are essential for the control and elimination of many childhood respiratory diseases.

1.6 million people die from lung cancer each year, making it the most deadly cancer.

Since 1964, 2.5 million non-smokers died from health problems caused by exposure to second-hand smoke.

Lung cancer is largely preventable through tobacco control.

• To improve the level of knowledge of primary care physicians in the care of patients with respiratory diseases, a program was developed for WORLD LUNG DAY. This mission was led by Prof. Marilyn Urrutia Pereira, with primary care physicians and nurses in the city of URUGUAIANA, RS, BRAZIL on World Lung Day and in partnership primary care physicians and nurses, health secretariat, children’s asthma prevention program (PIPA), Federal University of Pampa, GARD BRAZIL.
